Marriage Search

When searching, you **must** enter:

- A Family Name and Search From Date or
- A Registration Number.

You can search for:

- Marriages that occurred at least **80 years ago**.

Sometimes with pre 1875 records you may not get the result you expect so try:

- Entering only the names of the bride or groom not both.
- Entering the groom's names in the bride's fields or vice versa.

Registration numbers can be sequential as index books were scanned to create the records therefore the search results will display less information than records from 1875 onwards

To achieve the best results you should use a less is best approach. If you receive too many results then you may want to narrow your date range.
